

TWISTED RAVEN TATTOO

PLASTIC WRAP METHOD:

- **After an hour** (no more than 3) remove the initial bandage (plastic wrap)
- With clean hands, thoroughly wash the tattoo with warm water and soap. A natural soap is best like Dr Bonners or Dove soap. Use your hand to wash ~ (no washcloth) For at least 30 seconds to kill germs
Rinse off the tattoo and pat dry (we recommend a clean towel or a paper towel to dry)

• **NO LOTION** yet

- Wrap the tattoo with a new clean bandage (plastic wrap) until tomorrow morning.

+++++

The Next Morning:

- The tattoo will be sweaty, inky and possibly bloody under the plastic ~ This is NORMAL
- Remove the bandage (plastic wrap you slept in) and wash the tattoo as before.
- **NO LOTION** yet

The Second NIGHT:

- Wash your tattoo just as the first night (above) and wrap it for sleeping again.
- **NO LOTION** yet

+++++

The Second Morning:

- Your tattoo should no longer be leaking ink or much plasma
- Remove the bandage (plastic wrap you slept in) and wash the tattoo as before:

Caring for your new Tattoo

TEGADERM METHOD:

- Leave the original wrap on it for 2 days as long as the seal stays intact. If the seal breaks then revert to the Plastic Wrap healing method

+++++

TEGADERM: after 2nd day~

- Peel the wrapping off and wash for the first time.
- With clean hands, thoroughly wash the tattoo with warm water and soap. A natural soap is best like Dr Bonners or Dove soap. Use your hand to wash ~ (no washcloth) For at least 30 seconds to kill germs
Rinse off the tattoo and pat dry (we recommend a clean towel or a paper towel to dry)
- **NO LOTION** yet

- From this point on, your tattoo will no longer need wrapping
- After a while, (depending on skin type as to how long exactly) your tattoo will feel "tight" like sunburned skin

.... **APPLY LOTION** Use only *Redemption Tattoo Aftercare* or *Aveeno Daily Moisturizing Lotion* (green lid) Make sure your hands are clean and Use only enough to lightly cover the tattoo and rub it in. DO NOT "slather on" large amounts of lotion !!!

TOO MUCH LOTION and **PUTTING IT ON TOO OFTEN** will cause break outs around the tattoo

- After a while, (depending on skin type as to how long exactly) your tattoo will feel "tight" again.. Apply more lotion.

+++++

FROM THIS POINT FORWARD:

- Wash the tattoo at least once a day and keep applying lotion when it feels dry
- After a few days the tattoo will begin to flake and peel lightly THIS IS NORMAL~ apply lotion when tattoo feels dry
- **DO NOT** pick at or scratch at your tattoo
If it gets very itchy, apply a small amount of lotion to soothe OR a cool compress

-DO NOT SUBMERGE YOUR TATTOO or ALLOW DIRECT SUNLIGHT ON YOUR TATTOO FOR TWO WEEKS

I guarantee my work and can offer a "touch up" after 4 weeks at no charge ONLY if you follow OUR care instructions.. DO NOT heal differently on the advice of anyone else, If you have ANY questions or concerns during the healing~ CALL ME FIRST
